BIGARNY GUTIÉRREZ

Operations Coordinator · Dispatch & Case Follow-Through · AI-Enabled Operations

Managua, Nicaragua · +505 8686 3416 · nanygutierrez2003@gmail.com · linkedin.com/in/bigarny-gutierrez-20868629b

PROFESSIONAL SUMMARY

Operations coordinator with 2.5+ years of experience in logistics, customer success and back office, including 1.5+ years handling 40–70 cases a week for ~15 corporate accounts in U.S. last-mile logistics, working remotely. Keeps every case moving from first report to closure: coordinates with warehouses, operations and Finance, keeps trackers accurate, updates customers promptly and flags blockers early. Builds the tools that remove repetitive work: a self-sorting CRM, an inventory app on Google Sheets, scheduled automations and AI agents, always with a person approving what goes out. Industrial Engineering degree.

CORE SKILLS

Scheduling, dispatch & follow-through: delivery exceptions, address updates, return-to-sender, SLA follow-up, follow-up cadences, next-action tracking

Records & trackers: advanced Excel and Google Sheets, daily exception reports, investigation logs, weekly claim and billing reports, Power BI

Customer & vendor communication: written, phone and chat; formal and friendly registers; templates; written recap after every call

AI & automation: Claude (agents, skills, Claude Code, Cowork), scheduled read-only automations, Google Apps Script, prompt design, human-in-the-loop rules

Tools: Freshdesk · Excel · Power BI · Google Workspace · ClickUp · Notion · Slack · Instagram & WhatsApp Business

EXPERIENCE

UniUni Express — U.S. last-mile logistics (remote) **Jan 2025 – Aug 2026**

Key Account Representative · via WorkWiser Nicaragua

- Operational point of contact for **~15 corporate key accounts**; handled **40–70 cases per week** with timely follow-up and calm handling of sensitive escalations.
- Investigated and resolved lost and damaged packages, delivery exceptions, address updates and Return-to-Sender cases, following each one until closed.
- Daily liaison between clients, warehouses, operations and Finance to unblock critical cases and hold agreed SLAs.
- Kept investigation logs, daily exception reports and package-inquiry trackers in Freshdesk and Excel so the next person always had the full case history.
- Classified issues by root cause and flagged recurring patterns by account, route and distribution center.
- Produced weekly claim reports and invoice trackers for logistics partners, feeding reconciliation and billing.
- Standardized case documentation and follow-up flows per company SOPs, reducing rework and repeat inquiries on priority accounts. Reference letter from the Key Account Manager available.

Xolo Run — Race-registration platform, Nicaragua **Oct 2026 – Present**

Co-founder & Head of Commercial · part-time; processes and tools already built and running

Account operations & records

- Built the **“Cuentas clave” CRM** (Claude artifact with shared database) for a 3-person team: accounts, contacts, races, activity log, national race calendar and leads.
- Dashboard **classifies every organizer automatically** (confirmed / replied / no reply / not contacted). A “today” list shows overdue steps and priority accounts; one click copies a draft and **schedules the next follow-up at +4 days**.
- Researched and verified **24 organizers and 18 outbound leads**; anything unverified is labelled “to confirm”.
- One owner per account, one ClickUp task per account, one-page report after each event, weekly report cadence.
- Kept the team’s expense records: ~$310 in out-of-pocket costs tracked for reimbursement across three partners, with zero missing receipts.

Communication, reporting & AI

- Wrote the **client-relations playbook** (sponsors, organizers, influencers, runners, suppliers): reply in under 24 hours, no invented data, no firm pricing without approval, every agreement confirmed in writing; templates for first contact, follow-ups, post-call recaps and objections.
- Wrote recurring reports (weekly summaries, status reports, KAM and CRM reports) that turn product and market activity into plain language and **flag problems early**.
- Built a **customer-relations agent** that drafts messages in the right tone, and a scheduled automation (Mon/Thu 7:40 AM) that reads Instagram DMs **read-only** and updates leads. **Rule: the AI never replies to a client; a person always sends.**

Content & ads

- Instagram @xolorun: **793 followers; 10 reels total ~358,600 views**. Top reels: **113K**, **99.2K**, **51.4K**, 32.6K, 20.8K and 20.1K. About **$110 in paid ads**.
- Separate messaging by audience: runners vs. organizers, plus race-specific pieces (La Gran Navideña, Inferno Mombacho). Brand assets: logo rounds, email signature, WhatsApp channel, brand video.

GCO Active Wear — Fitness apparel brand **2026 – Present**

Operations & systems builder · app built and running; minimal ongoing time

- Built an **inventory, sales and cash app** (Google Apps Script web app on Google Sheets, installable on an iPad): dashboard, record sale / restock / return / damaged / gift, stock by size, set and unit, money and investment views.
- Live in use: **57 complete sets and 143 pieces across 9 color SKUs**, with sold-out, incomplete and low-stock alerts.
- Designed the **SKU system** (size-color-type, unique codes created automatically) and the set-vs-single-piece logic: a complete set equals the minimum of its pieces.
- Tracks profit per sale, total invested and amount left to recover, in USD and córdobas with an exchange-rate table.
- Reliability: **undo** for the last entry, **locking** so two people can't overwrite each other, readable errors. A ChatGPT assistant checks or records stock by chat with a confirm-before-record rule. Wrote a step-by-step user guide.

Toyota — California, USA **Nov 2022 – Nov 2023**

Customer Success & Back Office

- **Customer success:** answered customer inquiries and followed up after the sale to keep customers informed.
- **Back office:** kept quotations, financing options and documentation accurate and complete through closing.

Amazon — California, USA **Jun 2022 – Oct 2022**

Customer Service Associate

- Phone and chat support for order, delivery, refund and account issues; consistently met productivity and quality metrics.

FEATURED PROJECT

Claims & invoice reporting at UniUni — consolidated scattered claims into one tracker, classified them by root cause, and prepared credit estimates and a weekly report for Finance: one source of truth, with ready-to-review numbers every week.
